This package contains two STL files - both are the right hand magwell panel of the 5.56 boltcatch Firebolt. Both contain the Everytown logo - one file is INLAID 1mm INTO the panel and one file is EXTRUDED 1MM OUT OF the panel. You will still need to download the full firebolt package from TheGatalog and print all of the other parts, just use THIS panel for the right side magwell.

Replying to @Everytown

Hey @Everytown, how do you like this AR-15 “ghost gun” with a 30 round mag clipazine? I designed it special for you.

♦ There is a \$2 Aliexpress spring out there which does the job very well for this project, only downside is that this spring is 2cm longer than the 11" spring of this design (305mm). The extra 2cm does add stress to the .22LR rounds and feed lips, cutting the spring down would be an easy option. However, a custom length
